Nick Shorey: (17:28) Morning / afternoon / evening folks

Gulten Tepe: (17:28) Hi Nick, thank you

Julia Charvolen: (17:34) Goöran is not on the phone bridge.

Gulten Tepe: (17:36) Hello Thomas

David Olive: (17:50) Goran you will be the next speaker

David Olive: (18:03) Cyrus is next

Mark Carvell GAC Vice Chair: (18:06) When the GAC meets with Bryan in Jo'burg I suggest it would be valuable to focus on the TOR and modalities of his cross-community WG and how it will link to i. contractual compliance operations and ii. GNSO policy development.

Jamie Hedlund: (18:13) Thanks, Mark. This is a good idea. Please know however that this initiative is still very much in the early stages. We needed to confirm first that there was widespread community interest in the ad hoc working group. Next is to solicit interest to join and work on things like TOR, charter, objectives, modalities etc. We would very much welcome GAC member participation in the organization of the working group. Hope that helps.

David Olive: (18:14) Yes Cathrin you are next

David Olive: (18:16) I am lost my audio back shortly

David Olive: (18:16) I am now back

Gulten Tepe: (18:17) great, thank you David.

David Olive: (18:18) Cathrin, you will be next

Nick Shorey: (18:26) @David Conrad - if possible, it would be helpful if DART can also look at the speed with which abuse is seen post domain-name registration

Laureen Kapin: (18:30) RE: summary. it also be helpful if in addition to the summary about the data initiatives, (DART, ITHI, etc.), you could also identify sessions in Joburg which will be discussing these initiatives.

Mark Carvell GAC Vice Chair: (18:30) Would scope widening of spec 11 3 b an issue for a future iteration? Also child abuse?
