Pua Hunter (Cook Islands): (08:20) can't hear

Olga Cavalli: (08:22) Argentina supports what the rep from Iran is expressing

Harry Chapman (New Zealand): (08:24) yes

Pua Hunter (Cook Islands): (08:24) yes, thank you

Olga Cavalli: (08:24) yes

Olga Cavalli: (08:25) Goran there was an established process in 2014 which worked well and there was a previous consultation that could be checked at the local level with the cctld

Olga Cavalli: (08:26) unfortunately this was changed without consultation with the Gac

Olga Cavalli: (08:27) sorry i dont have a mic now

Maura Gambassi - ITALY: (08:27) Italy agrees with Argentina.

Göran: (08:31) Olga, do you have more information about that?

Olga Cavalli: (08:34) sure Goran can send the links but you team now about this, it was established by the end of 2014

Rajiv Bansal - India: (08:35) We agree with Argentina

Harry Chapman (New Zealand): (08:35) we can't hear you Singapore

Olga Cavalli: (08:35) vey low

Olof Nordling: (08:36) Singapore, please try to put your comment in the chat if possible

Queh Ser Pheng (SG): (08:37) Sorry that my mic isn't working well.

Akram Atallah: (08:39) Olga, the first phase was the first part of the contract language, the second part of the contract language was the last phase that was implemented...

Olga Cavalli: (08:40) Akram what I was referring is mechanism which worked and was transparent

Queh Ser Pheng (SG): (08:40) SG agreed with India that the previous notification process is helpful. The current notification process by the RO is voluntary. There is no way for gov't or ccTLDs to monitor which gTLDs has released the country code at the 2nd level.

Queh Ser Pheng (SG): (08:42) One more issue to share

Olof Nordling: (08:42) Happy to read out chat comments if you wish to rest your voice, Rob

kavouss arasteh: (08:42) SG+1

kavouss arasteh: (08:42) IND+1

Robert Hoggarth: (08:43) Thanks Olof. I'll keep channeling for now :-)

Boyoung Kim(KR): (08:44) SG+1. even though there is post investigation process, it is rarely possible for gov and ccTLD managers to check all the new gTLDs.

Queh Ser Pheng (SG): (08:46) SG has also shared at ICANN58 that the indicative pricing from ROs to reserve certain names is high. For example, US\$300 per name. Besides, defensive registration are not long term solutions as yearly registration fees need to be incurred on a recurring yearly basis.. There is also the question on whether such uses of public funds are justifiable.

Akram Atallah: (08:46) Olga, we released the 2 char codes in 3 phases, the first one was everything that's not char-char the second phase corresponded to the government approval language in the contract, the last phase of release was the second part of the contract language

kavouss arasteh: (08:46) from Kavouss to Akram and Goran, pls kindly confirm that the information that I asked will be provided to us  
Morris\_Taiwan: (08:47) Taiwan also second SG.

Olga Cavalli: (08:47) Akram thanks for the technical details of the process, what I am referring is a way of dialogue and notification which worked rather well

Nur Yushan Yusof 2: (08:48) Malaysia supports SG view

Göran: (08:49) Kavouss: could you please write down your request? You wanted to know how many registrations for ccTlds?

kavouss arasteh: (08:50) Please provide us

Olga Cavalli: (08:50) In the previous call we proposed to create a task force to follow up with this very important issue, among ICANN and interested GAC members

FENG: (08:52) very good approach

kavouss arasteh: (08:52) 1. the two letter characters and three letter characters (.ir, .irn which have been released and contracts were signed with ( name of registries)

kavouss arasteh: (08:52) 2. whether there are any explicit agreement from us to those cases

kavouss arasteh: (08:53) What has been released with explicit agreement using the same two and three letter characters, if any

Boyoung Kim(KR): (08:53) If some gov or some ccTLD managers find misuse on 2nd level of new gTLDs, what can be done? can that website be closed according to RO contract? cancel that domain? I want to know what can be done according to post investigation process.

FENG: (08:55) Thanks Akram for the answer

Olga Cavalli: (08:55) Robert you are a great moderator!!! Does not surprise me!

Queh Ser Pheng (SG): (08:57) KR + 1.

kavouss arasteh: (08:58) Support Olga

Nur Yushan Yusof 2: (08:58) KR+1

Robert Hoggarth: (08:59) thank you all for a very active dialogue and for all your spoken and written comments

Rajiv Bansal - India: (08:59) Thank You

kavouss arasteh: (08:59) I found this conversation positive, helpful and constructive tks Rob
