Nico Caballero (GAC Chair)

# What is a gTLD Registry?

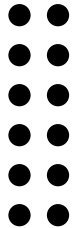

# What is a gTLD Registry?

# Registrar Overview

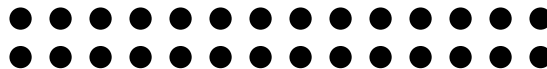

## ● ● What is a Registrar?

- Contracted with ICANN to manage domains on behalf of customers
- May choose to offer (or not offer ) any gTLD
- Enforces Consensus Policies and accountable to ICANN Compliance

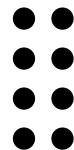

## Registrars can operate differently from one another

- Retail - servers customers directly
  - Wholesale - serves resellers (retailers), who have their own customers
  - Corporate - focuses on corporate/enterprise customers, including brand protection
  - Aftermarket - geared towards domain marketplace
-

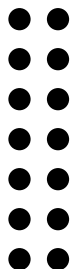

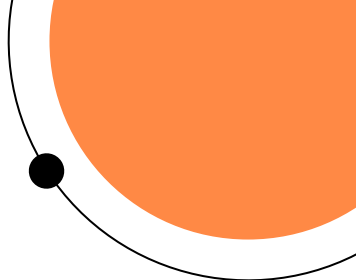

# DNS Abuse: What Comes After the Amendments?

Chris Disspain (RySG Negotiation Lead) & Owen Smigelski (RrSG Negotiation Lead)

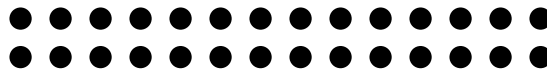

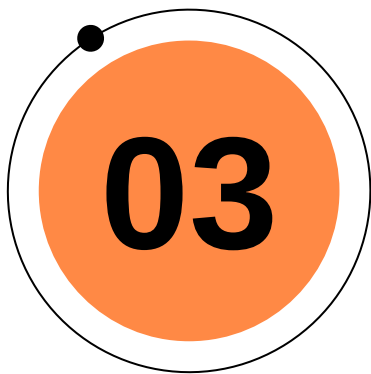

# DNS Abuse - What Comes Next?

- Data needed for next steps
  - ICANN Domain Metrics (fka DAAR)
  - ICANN Contractual Compliance
  - DNSAI Compass
  - CPH would like your feedback!
  
- Supportive of GNSO policy efforts
  - Focused/narrowly targeted
  - Reconcile speed with need for Issues Report
  - Focus on abusive activity rather than red herrings or content issues
  - Bad guys are listening

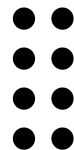

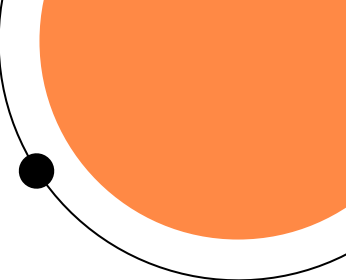

# Registration Data Request Service (RDERS)

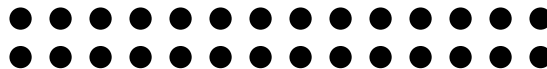

Sarah Wyld, Tucows

# Registration Data Request Service

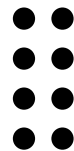

- ●
  - Gathering registration data disclosure request volumes
  - Help inform the Board's decision about building an SSAD
- ●
  - Two monthly reports published ([Jan](#), [Feb](#))
  - 75 registrars, 2332 requestors
  - 510 requests submitted, 8 marked as 'expedited'
  - 17% approved, 74% denied
- ●
  - Standing Committee's [task](#) is to review the monthly data, consider improvements & lessons learned
- ●
  - Areas for improvement:
    - *Registrars are asking for:* 'pending input' status; easy export; view all requests with date & IANA ID, ability to adjust request category; complete request info.
    - *Requestors are asking for:* Ability to request ccTLDs; ability to request Privacy/Proxy data reveal; ability to get data confidentially (without notifying the domain owner)
